

INSTRUCTIONS

- The waist strap needs to be **TIGHT** to ensure Exo is snugly pressed against your lower ribs and tummy.
- Use thorough, water-based lubrication on your penis and inside the sleeve to get started.
- The higher Exo sits on your ribs & tummy, the more sliding movement you'll get on your penis.

ASSEMBLY

1. Pop buckle(b) out of tummy plate(a) by twisting.

2. Wrap behind your waist like a belt, snap buckle back in and pull straps(c,d) **TIGHT**.

3. Start using toy with rings left **OPEN**. Only close rings if you don't get enough friction.

4. When ready, snap rings(e) and sleeve(f) into slots on tummy plate(a).

5. Rings(e) can be popped out of plate(a) by pushing hard with a thumb at the back.

6. To loosen strap, pop out buckle and pull at the strap on the buckle.
